GENOME RESEARCH REJECTS THE "GAY GENE" THEORY

This essay does not afford the space to more than mention that homosexual (heterophobic) stimulation in childhood is a causal factor in bi/homosexuality/heterophobia in youth and adulthood. This had been a given cross-culturally and historically until the recent political decision to ascribe a genetic basis for homosexuality/heterophobia—a decision dealt a powerful blow by the discovery of the genome structure. Writing in *The Washington Times*, circa August 1, 2000:

“The human genome finally has been sequenced, and with that, one theory seems to have fallen from favor - that of the "gay gene." Ideas about the origins of sexual preferences are reverting to the argument that homosexuality is a decision rather than an inherited trait.

Although no study has ever been able to prove that homosexuality is inherited, 35 percent of Americans think it is, according to a recent Harris Interactive poll.... The famous "gay gene" study has yet to be reproduced despite attempts to do so.

Former homosexual Anthony Falzarano, director of the National Parents and Friends Christian Ministries –insists people become homosexual through sexual molestation or rape, an absentee father, or an overbearing female influence during childhood. He bases these claims on his own research with more than 600 former homosexuals, as well as studies by the National Association for Research and Therapy of Homosexuality.

A massive historic, cross cultural, and literary literature exists on the child sexual abuse etiology and the role of absent/and/or brutalizing parents in the crafting of heterophobic males and females. *The Advocate* itself provided a 21% child sexual abuse admission rate among its male readers on August 23, 1994—suggesting that the real rate could be double, especially since the magazine did not include abuse data on boys over 15-years-of age! This author’s additional research in this area included a content analysis of the biographies of 150 famous homosexuals which yielded a rate of 67% involving man-boy sex¹. It is similarly typical that early abuse victims tend to similarly victimize boys at about the same age of their own abuse.

Moreover, recent research confirms that the early trauma of child abuse, not only alters the chemistry of the brain but, studies have shown, “puts people at higher risk for developing depression, anxiety disorders and other emotional illnesses later in life. “

According to the studies of homosexual/heterophobic health, these emotional imbalances typify the homosexual person, commonly resulting in alcohol and drug abuse—the second most severe health issue among homosexual/heterophobic males (after AIDS) and lesbians (after cancer).² The child abuse study appears in *The Journal of the American Medical Association* with this caveat: “the research also underlined the importance of addressing child abuse nationally. More than three million cases of child abuse are reported each year....this is a very large public health problem.”³ Hence, increasing child access further to heterosexually phobic, predatory men and women in educational institutions is wholly unacceptable.

TAX DOLLARS FOR CULT USED TO ACCESS SCHOOLCHILDREN

**Which
of
these
teens
is
NOT heterosexual?**

(Answer: ALL OF THEM! Just like 10% of your classmates...and perhaps you!)

of Gay, Lesbian and Bisexual Youth (14 to 21) since 1985.

AB 1785's protection of sexual orientation would assist, not interfere with, the access to child victims by providing power to closeted homosexual/heterophobic (and heterosexual) pedophiles in educational settings.

On the one hand, as seen in the "10% of your classmates...and perhaps you!" Lasso, Virginia Jr. Sr. High School newspaper advertisement at left,⁴ the homosexual movement has shown significant, planning, organizational commitment and effort in recruiting, cultivating and initiating the growing crop of youths who believe they were "born" homosexual/heterophobic.

On the other hand heterophobia (including bisexuality and transgendered) is the only recognized sexuality cult receiving both tax dollars and direct access to school children. Moreover, new laws protect the false "PROJECT 10" teachers by providing penalties for those who protest against such "professionals" and their teaching about sexual conduct within the school structure.

In San Francisco State University Professor Gilbert Herdt's book, *Gay Culture*, we find reports that the teacher (advisor, guide or "helping hand") aids recruitment and limits the potential for escape during all stages of initiation of children into heterophobia.⁵ Employing the language of cult and ritual, Herdt advises adult-led homosexual youth groups to direct the:

....adolescent's entry first into a self-affirming semisecret group, then by collective socialization into a "gay" cultural system.⁶ ... [Men] seclude and protect the youths, furthering their initiation... which socializes them further into the cultural system of the gay community"⁷

These "adolescent" initiates range, Herdt explains, "*from fourteen to just under twenty-one.*"⁸

THE HARD DATA ON HOMOSEXUAL V. HETEROSEXUAL CHILD SEXUAL ABUSE

A major study reported in the *Journal of the American Medical Association (JAMA)* concluded "Sexual abuse of boys appears to be common, underreported, underrecognized, and undertreated,"⁹ citing to other "large scale studies" in which 34% of 1001 men who had sex with men attending a sexually transmitted clinic...*reported* histories of sexual abuse."¹⁰ The same study—of underreported boy sexual abuse--stressed that males are much more reticent to report same sex child abuse, as an insult to their manliness perhaps, than are females.

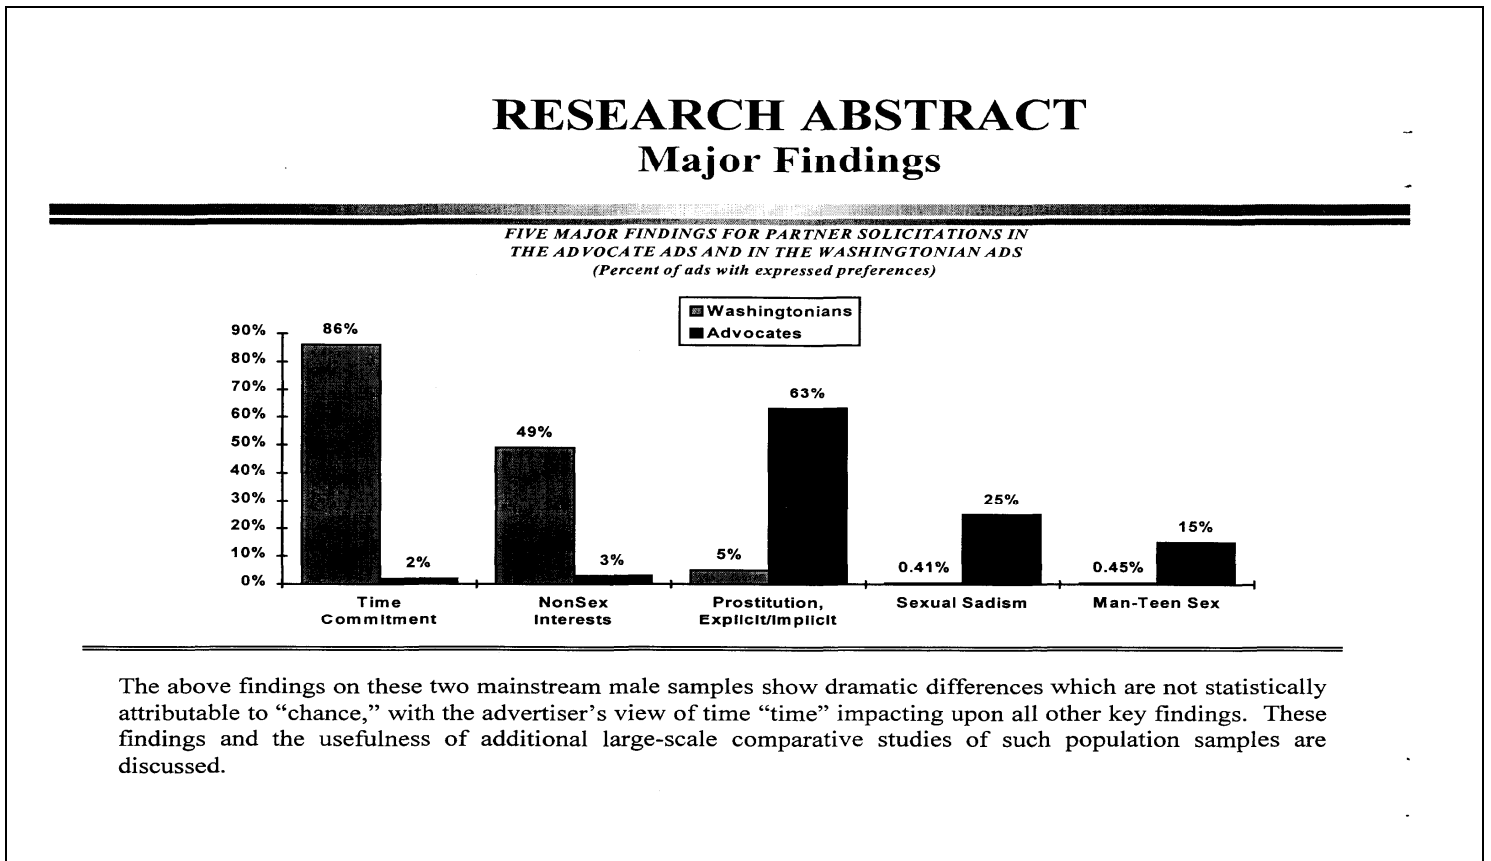

As noted much child sexual abuse goes unreported and some unsubstantiated. Hence, the following statistics, sources in each endnote, are to be viewed with caution as reflecting the best available current data.

Of 90 million adult males:

- (a) ~9% of heterosexual men (~86-88 million) victimize 8 million (25%) girls.¹¹
- (b) ~100%+ homosexual men (~2 million) victimize 6 to 8 million (17% to 24%) boys.¹²
- (c) ~3 to 4.5 boys are victimized per homosexual male.¹³
- (d) ~1 girl is victimized per 11 heterosexual males.¹⁴
- (e) ~50% of white gays had 500 plus, sexual partners, the rest averaged 100-500.¹⁵
- (f) ~25% white homosexuals admitted *sex with boys*, "sixteen years old or younger."¹⁶
- (g) ~50%+ of AIDS victims (n=279) had oral or anal sex with an adult male by age 16.¹⁷
- (h) ~20% of AIDS victims (n=279) had sex with an adult male by age 10 (1981-82).¹⁸
- (i) ~21% *Advocate* respondents (n=2,500) "were sexually abused by an adult by age 15."¹⁹

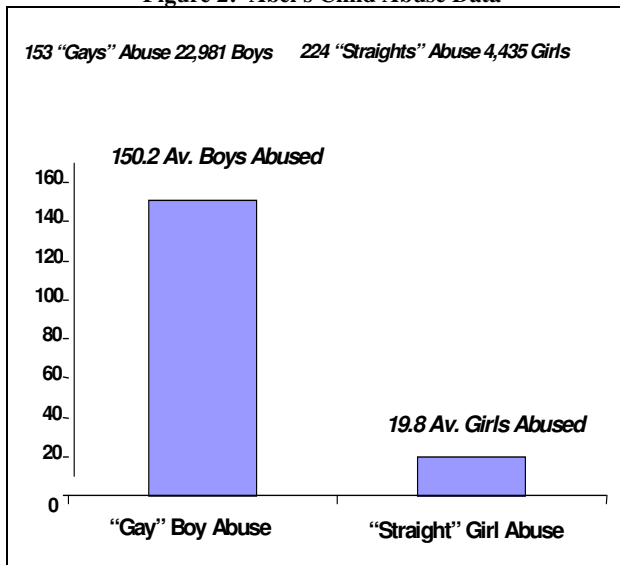

The Reisman & Johnson study found 15% homosexual boy partner solicitation versus 0.45% heterosexual girl partner solicitations as seen below.²⁰

Figure 1: Man-Boy Vrs. Man-Girl Sexual Solicitations in Reisman & Johnson Data

150 BOY “GAY” VICTIMS V. 20 GIRL “STRAIGHT” VICTIMS PER MOLESTER

Figure 2: Abel's Child Abuse Data

Sexual abuse of a male child by an adult male is defined as a homosexual assault. Homosexual males molest boy victims far more often than heterosexual males molest girl victims. Psychologist Eugene Abel reported homosexuals, “sexually molest young boys with an incidence that is occurring from five times greater than the molestation of girls.”

The rate of homosexual versus heterosexual child sexual abuse is staggering. Abel’s data of **150.2 boys** abused per male homosexual offender finds no equal (yet) in heterosexual violations of **19.8 girls**.²¹

“Nonincarcerated child molesters admitted to from 23.4 to 281.7 acts per offender....whose targets were males” (Abel et. al., at 32-50. 44, 48).²²

The 1991, *US Population, Statistical Abstracts* data are compared to the accepted child sex abuse data (1 in 4 girl victims and 1 in 6-8 boy victims) and accepted estimates of the homosexual and heterosexual populations.

Figure 4: Rates of Heterosexual Girl Abuse v. Homophobic Boy Abuse

The data above show that 1-2 million homosexual men, who comprise a very small percentage of the male population, managed to sexually abuse 6 to 8 million boys under the age of 18. Approximately the same number of girls were abused during the same time frame.

However, it took 86-88 million heterosexual men to prey on that number of girls. Again, the data demonstrate that the rate of homosexual molest of boys greatly outstrips the rate of heterosexual molest of girls.

Since 100% of homosexual males *do not* sexually assault boys, a vast subset of this highly cohesive population commits multiple, repeated child sex offenses. The homosexual population has been internationally identified in France, England and the USA as between 1% and 3% (in a range of 1.5% to 2%).²³ Hard data confirm international research and law enforcement reports. The 2% homosexual population harbors a vast pederast boy abuse subculture, a public health problem of immense proportions.

This subculture has resulted in tragic consequences for children. As noted above, the rates of anxiety, depression and general psychopathology as well as venereal and general disease, child pornography and child and adult prostitution and pornography claim the lives of children who are sexually abused.

CHILD PORNOGRAPHY A STANDARD IN EARLY "ADVOCATE" PERIODICALS

Homosexual child pornography and boy prostitution constitutes a massive, profitable industry, fully documented in the US crime statistics as well as in this author's publication (Judith Reisman and Charles Johnson, *Partner Solicitation Characteristics as a Reflection of Male Sexual Orientation*, 1994). The boy doll advertisement below was a repeated, standard advertisement in *The Advocate* for years, until the magazine began to reach out to mainstream American newsstands and libraries. The "HOT YOUNG GUYS IN SIZZLING SOLO J/O ACTION" was a similar offering in every periodical published during the first few decades of *The Advocate*. Such obvious "gay" child sexual abuse outreach would have to go underground until the public believed that homosexual lust was confined to adult men seeking men.

The heterophobic establishment met together to try to find ways to overcome the resistance of young boys to sex with predatory men.

In the mid 1980s San Francisco State University's heterophobic Sexuality Professor Gilbert Herdt challenged other leaders to gain access to schools, scouts, and other child "institutions" in order to reverse a growing youthful rebellion against homosexuality.

AIDS CAUSES BOYS TO "SHUN OLDER GAYS" SO RECRUITMENT INCREASES

The heterophobic predators launched advertisements seeking "gay" youths²⁶ due to an alleged knowledge of gay youth "suicide" and associated "hate" crimes. These ads began to appear regularly--as seen in the Lasso school newspaper ad. "Recruitment" conferences paid for by tax dollars, such as the Multnomah County announcement above left in Portland, Oregon also began to spring up across the country. How and why did this happen? Writing in *Gay and Lesbian Youth* (1989), the heterophobic Dr. Herdt explained the need for aggressive sexual recruitment of boys and girls. He wrote:

"We had not foreseen that...gay youth would also have to contend with the new horrors of AIDS [that]...*teenage gays and lesbians would shun older gays as role models or even as friends*²⁷...[To meet this challenge, said Herdt] *only now has gay culture begun to institutionalize "socialization" techniques* for the transmission of its cultural knowledge to a younger generation²⁸... [as] local "gay" movements *provide their own infrastructural support for the coming out process in teens.*²⁹ (Emphasis added)

AND GAY GROUPS DISCOURAGE AIDS TESTS

Douglas Feldman, a medical anthropologist claimed, "these kids are our [gay] future and we must invest in them."³⁰ He adds that their heterophobic organizations discourage having "gay" boys test for HIV.³¹ Why? "*Teenagers tend to be very susceptible to sexually transmitted diseases,*"³² observed Feldman. In any event, Feldman says these boys "*have about a one in four chance of developing AIDS in approximately 5 years.*"³³

How to counteract this unforeseen boyish fear of homosexual sex? Methods for youthful indoctrination were proposed in homosexual meetings, discussions, debates and conferences. Methods of socialization into "gay cultural values" "investing" in "these kids" were subsequently developed and implemented. The victim-minority propaganda techniques recommended in Kirk and Madsen, *After The Ball* were largely followed. The post Kinsey era and the rise of homosexuality has brought a exponential increase in both heterosexual and homosexual child pornography and prostitution. Adult sex with "consenting" minors is still statutory rape. Yet, the March 1992 *Advocate* magazine cover story blames boy victims, not their adult male victimizers,

BOY PROSTITUTION--"INTERGAY" HATE CRIMES AGAINST BOYS

"Gay Men View These Boys As Recreational Toys:"

“Gay Men View These Boys As Recreational Toys:” The post Kinsey era and the rise of homosexuality has brought an exponential increase in both heterosexual and homosexual child pornography and prostitution. Adult sex with “consenting” minors is still statutory rape. Yet, the March 1992 *Advocate* magazine cover story blames boy victims, not their adult male victimizers, for the disease, saying; “Teen Sex: They’re Doing it—And AIDS Is Killing Them By the Thousands.”³⁴

“Coming Out” Into Boy Prostitution. In 1972 there were 20,000 runaway girls and boys (called “throwaways”) in harms way in New York, “43 percent of them...between the age of eleven and fourteen!”³⁵ Recall, Robin Lloyd documented the press suppression of homosexual abuse and murder of boys in his expose of boy prostitution. “Boy prostitution... is now surfacing with the growing acceptance of homosexuality.³⁶ ... some New York City high schools students ran... prostitution rings³⁷... [while] street pimps recruit and train [boy] runaways.”³⁸

Introducing Lloyd’s book, Senator Birch Bayh, (D-IN), liberal former Chairman of the US Senate Subcommittee to Investigate Juvenile Delinquency, confirmed that Lloyd’s data were “frightening in its accuracy,”³⁹ about “a hitherto undiscussed facet of the homosexual world.”⁴⁰ Says Lloyd:

Perhaps half of the million runaway boys in this country (aged 10 to 16) are peddling their bodies to “chicken hawks”—older men who lust for “chicken [boys]”⁴¹... There are tightly run organizations... geared to provide wealthy clients with both pornography and boys... their boys will entertain movie stars, prominent athletes politicians, and in some cases, heads of state.⁴²

LLOYD: ROUGHLY HALF A MILLION PROSTITUTED BOYS

Lloyd’s observation that “Boy prostitutes in Times Square outnumber female hookers five to one” gives pause. At 1-2 million “gay” men, (under 2% of the 90 million over 18-male population),⁴³ 500,000 yields one boy victim per 2 or 3 homosexual males--and this does not count seduction in the “normal” boy population. Although few homosexual killings (to date) rival Jeffrey Dahmer’s gruesome cannibalization of 17 boys,⁴⁴ Lloyd cites the Houston mass murders of at least twenty-seven boys out of three hundred molested by “a homosexual trio of sadists.” Lloyd was concerned that press coverage of these rape-murders “would set the gay community back about ten years.”⁴⁵ But, while Kinsey’s fraudulent data (“10%” of the population is homosexual) are continuously reprinted, the Houston murderers and other sadistic boy sex killings are steadfastly buried.

As noted earlier, while the *homosexual* press often reports adult inter-gay murders, both they and the establishment press avoid covering homosexual assaults and murders of boys-like Jesse Dirkhising. Short of murder, parents commonly don’t prosecute homosexual abusers, fearing “the publicity,”⁴⁶ while police often finesse important or affluent predators out of town.⁴⁷

Having obtained endorsements from leaders in the homosexual movement,⁴⁸ Lloyd still exposes some homosexual child sex rings. Boise, Idaho “sheltered a widespread homosexual underworld that...had preyed on hundreds of teen-age boys.”⁴⁹

A Wisconsin town quietly suppressed, “a homosexual ring” of about thirty-five closeted men, including prestigious leaders such as a College Dean, a hospital president, a Roman Catholic priest, several physicians, a man “hired to teach at a school for mentally retarded children,” etc.⁵⁰ The “homosexual ring...had enticed and contaminated many small boys as

young as eight years old” into sex, with liquor and pornography.⁵¹ Investigator Clifford Lindecker, confirms Lloyd’s findings of brutal and “respectable” pederasts fueling a flourishing traffic in boy prostitution.

Boy prostitution...is growing and becoming more obvious as homosexuals come out of the closets and form gay rights groups, and police power is watered down by court decisions friendlier to civil rights than to law enforcement and protection of the public... [B]oys learn that they can earn good money doing something they and their friends have come to accept as normal behavior.⁵²

WEST: THE GAY LIFESTYLE LEADS “NATURALLY TO PROSTITUTION”

After admitting, “sex abuse in childhood as a cause of male prostitution has become almost conventional wisdom,” and that, “the perpetrators are nearly always men,” homophile, Donald West, in *Male Prostitution* protests that while his study of male prostitutes found high rates of child sexual abuse, he felt there was a high rate of consent.⁵³ Addressing boy prostitution, West says:

Gay Search... comments on the fact that children are often given presents after cooperating with an abuser and writes: “it is easy to see how being rewarded for sexual favours can lead... very naturally to prostitution⁵⁴... Boyer (1989) has argued that the culture of gay bars and meeting places, often referred to as a sexual market place (Read, 1980) by its emphasis on casual encounters and sexual conquest, holds out to young gays the expectation of patronage by older males and presents prostitution as a more or less normal aspect of the gay scene.”⁵⁵

Lloyd reports yet another “gay” child pornography case where a group of boys seeking “counseling” from a junior high “science teacher,” were recruited into sodomy and pornography.⁵⁶ One Los Angeles schoolteacher brought “groups of boys aged seven through thirteen across the border every three months.”⁵⁷ And West confirms common knowledge about both prostitution and homosexuality:

Many sexual assaults happening in later years were described during the interviews ... forced by clients and their accomplices to submit to unwanted, painful or damaging sexual acts. [J]ust as many men reported assaults in the course of sexual contacts unconnected with prostitution... the risk is to an extent inherent in some gay male lifestyles.⁵⁸

Ratio is 5:1 AIDS Boys to Girls:

"(The above statistics are taken from the study "AIDS Among Adolescents," published in the October 1990 issue of the American Journal of Diseases of Children.)"

The toxicity of "gay male lifestyles" and homosexual versus heterosexual child abuse is represented by a [5:1] ratio of boy-to-girl AIDS victims. As is documented in the Reisman & Johnson report, by 1991 the CDC identified 7,166 boys and 1,537 girls (also infected by bi/homosexual boyfriends) dying of AIDS.⁵⁹

WHERE ARE THE ARRESTS OF THOUSANDS OF MEN WHO KILL BOYS VIA AIDS?

Where are the thousands of child sex murder convictions for the men who fatally infected these boys (who then infect girls) or the outcry on behalf of these children heard in the establishment media? Instead of prosecution, schools provide carte blanche to predators by implying that boys with AIDS were "gay" from childhood.

By labeling boy AIDS victims "consenting gays," heterophobic/homosexual spokesmen "blame the victims," blaming ones own death upon the young "initiate."

At Least 84% of Boys with AIDS are Infected by Adult Men

The Whitman Walker Clinic advert reads, "Are you a man who has sex with men? If so, you should know that 1 in 5 of your prospective partners could be infected with AIDS."⁶⁰

As discussed earlier, homosexual men, as unattached to women, bachelors living for the moment, are documented as stunningly promiscuous with "43 percent" admitting to sex with over 500.⁶¹ This "1 in 5" chance of dying from AIDS is therefore 100% fatal for most children socialized into heterophobic/homosexual Gay Lesbian and Bisexual Youth school clubs. Too many of these children will join what appears to be the financially rewarding "profession" of prostitution.

Do no investigative reporters ask, "Which men gave 7,166 boys AIDS as of 1991? That is mass annihilation!

No heterophobic/homosexual press, no "gay" leader or organization demanded a moratorium on the activities of adult gay lecturers, "advisors," "guides" and "coaches" in the schools in the wake of the disease and deaths associated with homosexual sex. None have called for capture and punishment of the adult child sex abusers/murders. Even Gebe Kruks, a homosexual leader who protested these violations does not call for the arrests of the children's killers. Kruks wrote:

*Gay boys.... having sex for money, shelter, love--they are at riskGay men view these boys as recreational toys to be used. I have heard many stories of HIV-positive men having unprotected sex with boys. They don't think it matters.*⁶²

BOYS INFECTED WITH AIDS BY HETEROPHOBIC/HOMOSEXUAL MEN

To hide the fact that 84% of AIDS children appear to be infected by heterophobic bi/homosexuals, the “World AIDS Day” artfully reports “16% of adolescents with AIDS, aged 13 through 19... have been infected through heterosexual contact.”⁶³ *The Advocate* included this table, identifying *at least 59%* of adolescents with AIDS directly infected by adult bi/homosexuals. It is reprinted here verbatim.⁶⁴

Said *The Advocate*: Now in the big cities, if you have sex with two [gay] men, you have a 50% chance of...someone who is HIV-positive.”⁶⁵

Since homosexual activity allegedly starts younger than in the past--at about age 15⁶⁶ or younger⁶⁷ -- “advisors” lure boys into “coming out” (“the most important rite of passage in gay life”)⁶⁸ to venereal disease for most, and death for at least 25% in approximately 5 years.

Figure 4: A Minimum of 59% of Boys Infected by Men

“HIV Transmission Routes in Adolescents Aged 13-21 in the United States”	
Male Homosexuals/bisexual males	51%
Transfusion recipients	22%
Male homosexual intravenous drug users	8%
Heterosexuals	8%
Intravenous drug users	6%
Other	5%

“INTERGAY BATTERY” AS HETEROPHOBIC/HOMOSEXUAL HATE CRIMES

If children are more at risk of sexual *disease* and prostitution from homosexuals than heterosexuals, are they more at risk from sexual *violence* as well?” We already addressed this in the citations to West, but in their frank but empathetic book, *Men Who Beat the Men Who Love Them*, homosexual activists, David Island and Patrick Letellier document inter-gay battery as a primary homosexual health problem after 1) AIDS (males), Cancer (females) and 2) drug abuse. They write:

“It is...likely...the incidence of domestic violence among gay men is nearly double that in the heterosexual population...as many as 650,000 gay men may be victims of domestic violence each year⁶⁹... *50 percent of gay male couples*⁷⁰... *We believe [heterosexual domestic abuse] is closer to 20%*..⁷¹ [D]omestic violence is acknowledged, talked about, and dealt with more in straight relationships than in gay male relationships.”⁷² (emphasis added)

***The Advocate* reports Same Sex Hate Crimes, for at minimum:**

- 75% of its readers admit to engaging in violent sex.
- 20% engaged in sadistic “bondage and discipline.”
- 55% engaged in other sex acts using painful objects.⁷³

Compared to heterosexual assault, the rare assault inflicted on someone at a bar, and the singular although horrible aberrant murder--it is fair to say that the on-going most significant "hate crimes" against male homosexuals (as "gay" activist writers and researchers Kirk and Madsen stated) are inflicted *by* heterophobic/homosexuals.⁷⁴

"[In 1987] the San Francisco police responded to no fewer than 100 calls per month for gay and lesbian domestic violence ...[T]here are thousands upon thousands of victims of gay men's domestic violence in the United States each month."⁷⁵

In 1981 the heterophobic, homosexual press reported that about 10% of San Francisco's homicides resulted from homosexual sadomasochistic abuse.⁷⁶ Hiding these facts from the public allows the use of the classroom to seduce children into a heterophobic life of violence and sadism and too many into the trade in youthful prostitution and pornography. Additional *research* on teachers as predators, beyond SESAME, is needed as we face the upcoming campaign to bring increasingly graphic and unscientific information about sex into the schools, K-Ph.D., standing on the Kinsey canon and those "experts" who grew out of the Kinseyan sexuality field (see the "Scientific Authority" flow chart below).⁷⁷

THE "INSTITUTE FOR ADVANCED STUDY OF HUMAN SEXUALITY" IASHS

IASHS GRADUATES AND TEACHERS LEAD CAL STATE NORTHRIDGE, SAN FRANCISCO STATE COLLEGE, UC BERKELEY, LONE MOUNTAIN COLLEGE, CALIF., UNIVERSITY OF SOUTHERN CALIFORNIA, UC IRVINE, ETC., HUMAN SEXUALITY, AIDS PROGRAMS.

Explicit Sexual Part of Image Redacted

The conclusion of one of many illegal, semi required IASHS student/faculty bi/gay sexual orgies. These newly 'trained' Ph.D's, masters and bachelors of education, sexology, human relations, sexual orientation, etc., teach the teachers who AB 1785 would have teach all our children about sex and "relations."

Much of the 'hate crime' legislation while being anti-American, anti-child, anti-free speech, anti-Judeo-Christian and anti-family, is designed to both eliminate "hostile" thoughts in our Tom Sawyers and Becky Thatchers, and would protect same sex violators and those who victimize

boys and girls via sexual recruitment. Such legislation would have children torn from their parents' and religious protection by *sexuality specialists whose academic curricula mandates up to 120 hours of viewing, (and often making) pornography including "erotic massage," "self massage," "fantasy," "masturbation," etc.*

Alongside poetic references to God, faculty and students from San Francisco's Institute for Advanced Study of Human Sexuality, (America's main sex-credentialing agency), perform illegal pornographic group, couple and autoerotic sexual acts (See the collection of these IASHS photographs in *Meditations on the Gift of Sexuality, 1977*).

Such "academic" training has informed the sex counselors, therapists, safe sex and AIDS educators drafting children's sex education curricula and teaching and training kindergarten to Doctorate. The IASHS graduates Masters of Public Health in Sexology; Doctor of Education; Doctor of Human Sexuality; Doctor of Philosophy; Safe Sex educators, etc. Some such graduates would in the photo above, but the graphic images, including blatant child pornography, are available in the cited *Meditations on the Gift of Sexuality*.

This essay is an excerpt from a larger document. Please see drjudithreisman.com, "Crafting Bi-Homosexual Youth" for a more detailed discussion of this problem.

- ⁷² *Id.*, at 16. As a side bar, it is striking that violence to boy children by trusted adult males is also a common theme in homosexual and “heterosexual,” pornography. In the latter, young girls are seduced and raped but rarely illustrated as stabbed or cannibalized (unless in a scene with a boy). For example, one *Playboy* cartoon has Santa, having just eaten a little lad, tell his elf, “Bring in another!” A *Penthouse* cartoon depicts Santa having blown apart a small boy’s brain with the caption, “That’ll teach you to be a good boy,” while in another *Penthouse* cartoon a Victorian family at the dinner table, prepares to eat a headless, naked, cooked boy as father says, “And God bless Tiny Tim,” (Tim’s crutch laid aside forever). *Playboy*, January 1977 at 221; *Penthouse*, December 1977 at 208, *Penthouse*, December 1988 at 210.
