"The first High Court [Australian] judge to declare his homosexuality, has paid emotional tribute to Alfred Kinsey"

By [Judith Reisman](#)

As we look to a new member of our highest court, note, "Michael Kirby, the first [Australian] High Court judge to declare his homosexuality has paid emotional tribute to the father of modern sex research Alfred Kinsey."

Kinsey changed him and "helped to change the world." [1] He said: "*Kinsey spoke to our species and not just to the US.*"

Decades of the managed academe and mainstream media have concealed Kinsey's science frauds, causing the judiciary to erroneously recast "our species" laws, ideas, and conduct in Kinsey's bi/homosexual, sex addict and *pederast activist* image.

For example, Justice Kirby, was President of the International Commission of Jurists, <http://www.icj.org>, with affiliates in over 70 countries of lawyers, judges, legal academics and law students. As such, Justice Kirby's false notions of human sexuality would help breed a sexually radical judiciary.

The retired Australian High Court Judge learned as a vulnerable teenager, that Kinsey proved all sexual lust was equal, "just a variant of nature."

Australian commentator, Bill Muehlenberg replied to Justice Kirby, in *Christian Today*, "If anyone wonders why society is in such a mess, they simply need to look at our ruling elites....judges, movers and shakers, and intellectualoids."

For an example, a former High Court judge of Australia "is publicly "praising one of the most notorious sexual perverts in recent history."

Trusting the Kinsey Institute party line, Justice Kirby believed the professor was "a shy taxonomist" who objectively exposed "nature's truth, revealed by science." He wrongly believed Kinsey based his "report" *Sexual Behaviour in the Human Male* on almost 18,000 people in his 1948 book, a cross section of Americans.

Having faith in the alleged "shy," married Kinsey and his co-conspirators, Justice Kirby lectures on "homophobia" as reinforced by "religious instruction."

But Justice Kirby did not know Kinsey lied about his interviews, that he tossed out 75% of those he

didn't like, or, as Muehlengerg writes, that the data were largely "imprisoned sex offenders, criminals, pedophiles and prostitutes" who Kinsey called "normal and mainstream" in order to normalize "perversion."

Trusting Kinsey meant Justice Kirby, like many other judges, would and cast votes on marriage, sodomy, hate, on all sex issues, based on Kinsey's lies about the Greatest Generation, likes like:

- sexual promiscuity is normal thus harmless,
- 10 to 37 percent of men are sometime homosexual,
- all pornography is harmless, and healthy,
- children are sexual from birth so adult sex with children is harmless unless parents upset the child,
- masturbation is never obsessive, and creates better marriages,
- prostitution is harmless and common,
- all orgasms are good, from all sources, the more the better,
- abortion is normal and harmless,
- explicit, early school sex education will reduce sex crimes,
- all sex laws should be lightened or eliminated,
- parole should be granted all sex offenders.

Justice Kirby believed Kinsey was 'straight' and therefore that his famous sex scale was objective. It "swung from a zero rating (exclusively heterosexual) through three (equally heterosexual and homosexual) to six (exclusively homosexual)," meaning all bi/homosexual relations are normal.

The "openly" homosexual Justice joined the board of the Kinsey Institute, famous for its massive pornography cache, thus demonstrating a valuing of pornography (the Institute's once available child pornography stash is *apparently* now confidential).

Al Kinsey and the sexology field he began, shaped western society's beliefs and understanding of the nature of human sexuality taught at every level of education — elementary school, high school, and college — and quoted in global textbooks and courtrooms as scientific truth.

Walter W. Stewart, research scientist, National Institute of Health wrote, "Because of the obvious importance of Kinsey's work, these questions [of bad science and child abuse] need to be thoroughly and openly debated by the scientific community."

This debate has been hijacked to this day by the Kinsey cabal; allowing millions of trusting teenagers like Kirby to become lawyers, justice officials, judges, and legislators who legalize sexual conduct based on a program of sexual lies.

Jack Sonnemann the Director of the Australian Federation for the Family, criticized Justice Kirby, saying, "International Planned Parenthood, the international sex education community and many in academia, the judiciary and the media also bow to [Kinsey]: a sadomasochistic, bi/homosexual

masturbation and pornography addict, a psychopath who employed pedophiles to sodomize little boys."

Sonnemann added that, "Law enforcement officials, concerned scientists and lawmakers and education professionals have all tried to determine what happened to "The Children of Table 34," all to no avail."

"They are blocked every step of the way by the totalitarians at Indiana University's Kinsey Institute. Kinsey's legacy as a sexual torturer of children and infants should in no way be praised."

To have yet another United States Supreme Court Justice who believes Kinsey's sexual frauds can lead only to further social disaster.
